Description

The SATO Eco wristband is a reliable and cost-effective solution for patients undertaking short hospital stays of up to 3 days. Convenient direct thermal printing negates the requirement for a ribbon, printing crisp and durable patient information onto a soft, synthetic wristband.

For patient safety and hospital employees' peace of mind, the wristband is available with two closure options, clip (for adults) and clip or adhesive with tamper evidence system for adults and infants. This feature guarantees that the data collected from the patient on admission is non-transferable.

Key Features:

- High-quality direct thermal print method
- Soft, synthetic material
- Robust adhesive closure with tamper evidence system
- Alternative clip closure for adults (clips not included)
- Hypoallergenic, latex-free, water and soap resistant
- Non-skin irritant (tested in laboratory based on ISO standards)
- Adult and infant options available
