Description

BOOST EFFICIENCY AND CUSTOMER SERVICE

Don't compromise device design for enterprise functionality — or enterprise functionality for device design. With a rugged industrial design that looks and feels like the most popular pocketable consumer-style smartphones, along with the Zebra-only enterprise-class features, power, security and manageability your business requires, TC51/TC56 is a touch computer that is truly in a class of its own.

The availability of products and services may vary by country. Please check with your local Zebra representative for further details.

- **Beautifully designed for work, but cool enough for play**

Great design is more than just aesthetics –it's functionality too. The Zebra TC51/TC56 Series mobile computers are designed to perform beautifully in the enterprise, making the role of your workforce easier and more productive. With a contemporary design and the modern convenience of a smartphone, it has integrated features and the rugged design your business requires.

- **Backed by the Zebra ecosystem**

Zebra's TC51 and TC56 are more than just handheld devices; they connect your enterprise to an ecosystem of support, software and services designed to transform your business' performance today and into the future.

- **Powerful Performance**

A super-efficient hex-core processor uses up to 15% less power, applications run up to 5 times faster and the 5 inch sunlight readable display with capacitive touch panel gives your workers easy, familiar and flexible multi-touch operation that works even when wet - with a gloved finger or a stylus. The TC51 and TC56 also feature an integrated 2D imager as well as Mobility DNA — our suite of business,

productivity, management and development tools for Zebra mobile computers.

The next evolution in enterprise touch computing in the field

Whether in the office or on the road, today's workers want a device that is every bit as contemporary and easy to use as the smartphone they use every day, with anywhere connectivity. Your business needs a rugged device that will last for years, with all the features you need to enable your workers to achieve peak productivity in the field and keep your data secure. Designed for the new business world, the TC56 industrial design looks and feels like the most popular pocketable consumer-style smartphones to meet worker expectations, along with the enterprise-class features, power, 4G/LTE cellular connectivity, security and manageability business requires. With unique Zebra-only features, TC56 is a touch computer that is truly in a class of its own. The TC56 — the next evolution in enterprise touch computing.
