

Voyager 1400g Upgradeable Area-Imaging Scanner

Honeywell's Voyager® 1400g is the ultimate 2D barcode scanner. This linear imager is capable of reading even poor quality and mobile 2D barcodes. 2D barcode scanners are becoming increasingly popular across a wide range of industries for a number of reasons. Enterprises have a growing need to capture large amounts of data, despite space constraints, while others are being required to read 2D barcodes due to government regulations or supplier mandates. An even larger group of enterprises simply have the desire to leverage emerging trends that require linear imagers with advanced area-imaging technology, without needing to purchase additional scanning hardware. The 1400g's features go above and beyond in meeting 2D scanning needs.

Description

Voyager 1400g Upgradeable Area-Imaging Scanner Features and Benefits

Reliable Data Collection: Offers omnidirectional reading of virtually all linear bar codes and the most widely used 2D bar codes, including poor quality and mobile bar codes (2D decoding available in select models)

Remote MasterMind™ Ready: Reduces total cost of ownership by providing a turnkey remote device management solution that easily manages and tracks usage of installed devices

Future Proof: Delivers affordable scanning of 2D bar codes, allowing enterprises to meet their current and future bar code scanning needs with a single device

Flexible Licensing Solution: Meets diverse scanning requirements by offering models with basic functionality—purchase software licenses to enable additional functionality as the need arises
